Interesting. Women in the developed world are among the most privileged humans ever to walk the planet, because men in power handed "rights" - in realities, powers amounting to privileges - to women they should not have. The most obvious example was the right to kill unborn children. 10+ million unborn children killed in the UK since the 1967 Abortion Act, WHO estimates there are 75+ million killings every year. By a huge margin it's the largest genocide in human history - men have never come close to killing so many human beings - but because it's carried out at the behest of women, it's a genocide with no end in sight.

In the UK females are legally protected against Female Genital Mutilation under specific acts passed in the 1980s, while males have zero state protection (even as babies) against Male Genital Mutilation. These poor boys are victims of GBH under the Offences Against the Person Act 1861, and no exceptions are allowed under the law for cultural or religious reasons. I tried to take out a private prosecution of a circumcising doctor but was refused leave to do so by a judge.

Our manifesto explores 18 areas where the human rights of men and boys are assaulted by the state's actions and/or inactions, almost always to privilege women and/or girls. For decades there have been NO areas where the human rights of women and/or girls specifically have been assaulted by the state's actions and/or inactions. Yet we have a Minister for Women & Equalities, a Minister for Women, and a Minister for Equalities (all three posts invariably taken by women). As Toby points out, no Minister for Men.

Every major political party treats men (who collectively pay 75% of the income tax collected by the government) and boys as sub-human. A plague on all their houses.

White Privilege is a myth, too.
