Mike Buchanan Bedford, United Kingdom · 2 minutes ago

Performing circumcision on non-medical grounds - Male Genital Mutilation - in the UK is a crime under the Offences Against the Person Act 1861, being at least ABH and almost certainly GBH. No exemptions are permitted for religious or cultural considerations. It is utterly scandalous that the state does not protect male children, many of them just babies. I've sought leave to prosecute a circumcising doctor but without success.

Circumcision ALWAYS leads to serious damage, that's the objective. 90% of the fine-touch nerve cells which give men pleasure during sex - Meissner's Corpuscles - are in the foreskin, which is thrown away (or used in women's skin creams).
