It should made a criminal offence to circumcise a boy before 18 years and then only with consent.

It should be made illegal until a boy reaches 18 and can make the decision himself. Any doctor who performs this on anyone under 18 should be struck off and/or prosecuted.

women scream loud when men are in charge and have opinions about their bodies. Then why should women and female nurses make such a fuss over circumcision ...It has been proven to reduce STD and all types of infections etc.

It makes me angry just thinking how any adult can decide to mutilate a baby for no immediate injury/life saving medical reason. If it's so bloody important to a parent, ask your son when he's 18 years old if he wants to be mutilated.
